## SOFTWARE ENGINEER

Full Stack Software engineer experienced in Ruby on Rails, React, and JavaScript based programming. With a background in technical problem-solving, I collaborate well on a team, communicate clearly, and remain calm in chaotic situations. I learn from failure, thrive on feedback, and am self-driven. My love of software development stems from the challenges it brings to create accessible and easy to use software for all.

## TECHNICAL SKILLS

JavaScript, Ruby, HTML, CSS, React JS, Redux, Ruby on Rails, SQL, SQLite3, OOP, Rails API, GIT, PostgreSQL

## TECHNICAL PROJECTS

### Incident Command App - [Github](#) | [Demo](#)

*An app that allows an emergency commander to keep track of emergency incidents, and resources allocated.*

- Implemented encrypted password storage through the 'bcrypt' gem in rails.
- Maintained state utilizing Redux.
- Developed a full stack application utilizing REACT on the front end and Rails on the backend.
- Utilized Rails to create a functioning API with custom and RESTful routes.

### Student Fundraising App - [Github Frontend](#) | [Github Backend](#) | [Demo](#)

*An app that allows a youth leader/teacher to keep track of the fundraising efforts of their students and donors.*

- Utilized REACT with Sinatra to build a full stack web-based application.
- Created custom routes to implement full C.R.U.D. on the backend.
- Implemented state to maintain various functionality of the application.
